Experiences

Senior UI Developer Consultant // Bibliothèque et Archives nationales du Québec (BANQ)

Since June 2016 (Current)

I have been brought onto the challenging project of revamping the BANQ's 26 year old archiving solution into an interactive and modern AngularJS web application.

Senior UI Developer // TEKsystems Global Solutions

April 2016 to June 2016

Finally working for one of the best technology solutions firm in the world! Learning, and exceeding expectations is right up my alley!

Web & Software Project Manager // QuickSeries Publishing inc.

October 2015 to April 2016

I started working alongside my father, helping him transform his business from a publishing to a software company. Managing a team of mobile and web developers, playing the role of the SCRUM master, participating in exec level decisions, designing app styleguides, developing websites and web apps, were only some of my duties.

Lead, Senior UI / UX / Front-End Designer & Developer // Yellow Pages

October 2013 to July 2015

I've embarked on a huge challenge: leading the front-end development efforts on a team that is changing the future of Yellow Pages Group. This tasks required us to consolidate over 40 sales tools into a single web application, using cutting edge web technologies, modern and interactive designs, and new ways of managing software development. This opportunity is my career's most important one, as it is the most complexe, challenging but fun project I have participated in so far.

Chief UX Developer // Optima

June to October 2013

Joining a team of designers and developers to carve out the best social and analytical web applications on the market.

Web Designer & Developer // David & Goliath

April to June 2013

Managing and coordinating the web design and developement efforts to exceed our customer's expectations time after time.

UI / UX Consultant // QuickSeries Publishing inc.

Since June 2011

Taking part in initial project development meetings at QuickSeries Publishing, I had the opportunity to guide certain aspects of the UI / UX for their current QuickSeries Mobile app on iPhone, Android and BlackBerry.

JustinWeb // Freelance

Since 2011 (Current)

Freelance web application designer, developer and consultant.

inVantage // Founder & CEO

August 2011 to August 2012

inVantage was a small software development company with the goal to innovate and revolutionize how we integrate and use software for both the professional and the everyday user. It unfortunately failed, but I still came out a winner with everything I've learned. I will forever carry this experience forward.

Luxart Productions inc. // Founder & CEO

August 2009 to January 2012

Luxart Productions was a sound recording and film editing studio. This is where I learned most of what I know today about keeping a healthy client relationship and provide the best service I possibly could.
